My First Book

by Test Author

1. PDF Settings Dialog (frontend/src/components/PDFSettingsDialog.tsx):
   - Elderly-friendly UI with large controls
   - Page size selection (A4/Letter)
   - Font size slider (10-14pt)
   - Line spacing options (1.5x/2.0x)
   - Toggle for header (title & author)
   - Toggle for page numbers
   - Clear "Generate PDF" button
2. Document Page Integration:
   - Added prominent green "Generate PDF" button
   - PDF settings dialog popup
   - Automatic PDF download after generation
   - Success/error messages
   - Loading states

How It Works:

1. Open your document in the editor
2. Click the green "Generate PDF" button
3. Customize your PDF settings:
   - Choose page size
   - Adjust font size
   - Set line spacing
   - Include/exclude header and page numbers
4. Click "Generate PDF"
5. The PDF is generated on the server and automatically downloaded to your computer!

The PDF will include:

- Professional formatting
- Title page with project title and author name
- Justified text with paragraph indentation
- Optional headers and page numbers
- Clean, readable layout perfect for printing or sharing
